Business Updates

- September is the seasonal low of the year
- SZ TC broadly flat MoM vs August
- SH TC down MoM — mainly LJZ, as the summer holiday ended and tourist traffic eased

Product Updates

SZ

- Healthy-product line: 4 x 4-inch reduced-sugar cakes, white sugar replaced by a healthy sugar
- 3 ciabatta sandwiches applied on Vesta ciabatta; the pineapple-sausage one entered Class A

SH

- Dubai Chewy Cookie, launched Sep 12: 179 pcs in 4 days across the 2 stores; S1 by daily run-rate, with good market acceptance
- Late-Aug co-brand with Fujian heritage brand Jiaqing: mung-bean & sesame cakes, 360 boxes sold; campaign materials highlighted the "time-honoured brand" and "low sugar" appeal, lifting consumer preference; first order 288 boxes, already topped up
- 5 new sandwiches in early Sep (3 with Labarra, 2 in-house); all 5 entered the S/A class
- Croissant project update: the Vesta Rondo line needs adjustment, or a change of the core cutting blade, before it can proceed; the matter is to be submitted to management for evaluation

- All amounts in ¥ (RMB)
- MoM = vs. the prior half (H1 Sep vs H1 Aug)
- YoY = vs. the same half last year
- TC = transactions (orders)
- AC = average spend per transaction
- Attainment = MTD sales ÷ operating-day budget. For daily-operating stores this equals calendar-day run-rate. For Xili (🏪), H1 of Sep (Sep 1-15) uses historical avg selling days as an estimate, to reflect its non-daily selling pattern.
- SZ Subtotal & GRAND Avg AC: full-store value, with ex-Xili (excl. CK store) in italics below
- Xili (🏪) is the central-kitchen store: it sold on 7 days in H1 of Sep (Sep 1-15), so its daily sales, TC and attainment reflect actual selling days.
